

Quarterdeck's values, vision and mission is

INSPIRING

CONSISTENT EXCELLENCE

ENVIRONMENTALLY ACCOUNTABLE

What does this mean?

At Quarterdeck, we're not just passionate about serving flavors of the Middle East or crafting seasonal menus around the farm-to-plate philosophy. We are also committed to making a positive impact on our planet.

As an ecologically aware organisation, we've taken significant steps towards sustainability.

We have completely **phased out single-use plastics** from our operations and replaced them with environmentally conscious alternatives. Our cups aren't just used once and thrown away; they're **recycled in our takeaway cup bin**, ensuring that we contribute as little as possible to landfill waste. We've **implemented** a robust **waste separation protocol** to minimise the amount of unsorted waste we generate.

But our sustainability efforts don't stop there. We also give away our **coffee grinds for reuse**, turning what would have been waste into a resource.

Every decision we make, every product we use, runs through our ecological filter. It's our way of ensuring that we're doing all we can to protect and preserve the environment.

When you dine with us, you'll not only experience our range of Middle Eastern flavors, but you'll also be supporting our dedication to sustainability.

Our menu features the highest quality produce, seafood, meat, and poultry, sourced from **local suppliers** who share our commitment to sustainable practices.

To complement your dining experience, we offer a carefully curated wine list featuring selections from boutique **Australian wineries**. These wines are designed to enhance the flavours of our dishes and stimulate conversation at the table.

Join us at Quarterdeck, where fine cuisine meets environmental responsibility.
